THE FLORA AND FAUNA OF THE HACKENSACK RIVER WATERSHED

THURSDAY DECEMBER 13 – 7 PM THE FRELINGHUYSEN ARBORETUM

353 East Hanover Avenue • Morris Township, NJ

Explore one of the most unique habitats on earth: an urban wilderness, with a talk by Riverkeeper Captain Hugh Carola.

The Hackensack River watershed covers a 197-square mile area in northeastern New Jersey and southern New York. It is a place where humans and wildlife have learned to co-exist and flourish. The uppermost portion of the watershed is less developed than the highly urbanized lower portion which comprises the Hackensack Meadowlands.
